## MAESTRO DESIGN

Lynes is the first patented product introduced under the new Maestro Design label. Developed from an innovation that has been awarded a Red Dot Design Award, we immediately set the tone. We lift wall and ceiling applications to a higher level by integrating invisible lighting. A play of light and lines in which minimalism is key ...

— Lode Espriet, Product Designer

Natural Oak →

“ARCHITECTURAL LIGHT  
IN ITS PUREST FORM,  
A TRUE STORY OF  
LESS IS MORE.”

## PROJECT — ZEN SPACE

Concrete has played an important role in our interiors for a while. This client chose the same concrete decor for his wall, ceiling and lynes in his private space. An original combination that feels anything but cold. In combination with plants and soft fabrics, lynes creates a relaxing and soothing effect. The minimalistic integration of light provides the finishing touch.

## PROJECT — OPTICS PIETERS

Optics Pieters, located in Kortrijk, recently moved into a new building. In collaboration with interior architect Sofie Christiaens, the business owners opted for a full wall of lynes in the Natural Oak decor. Atmosphere and conviviality integrated in a modern and contemporary concept was very important in the creation of the new interior. Basic profiles are alternated with a number of light profiles in the same décor. The door leading to the private space has been fully integrated in an invisible way.

↓ Lacquered White

## INVISIBLE LIGHT

A decorative concept with the possibility to integrate a completely invisible LED lighting system. Lynes combines architectural elements and lighting in a subtle way in which light seems to appear out of nowhere.

## CONTEMPORARY DESIGNS

The lifelike décors were inspired by 5 moods, developed in collaboration with a well-known trend agency. Thanks to their unique texture, the profiles feel very realistic. Highly suitable for accent walls.

## ACOUSTIC EFFECT

Lynes has excellent acoustic characteristics. The free spaces between the profiles ensure good sound absorption.

## EASY (DIS)MOUNTING

Lynes is easily assembled and disassembled thanks to the inventive click system.

**1 BASIC PROFILE**

30 x 40 x 2700 mm

High-quality MDF covered with a decorative foil.

**2 LIGHT PROFILE**

30 x 40 x 2700 mm

PMMA light profile covered with a decorative foil. Also available without foil for functional lighting
